ADDITIONAL COMMENTS:

Cheshire Young Carers is pleased to present this school with the **Bronze Award** in recognition of their commendable efforts in supporting young carers. This award signifies that the school has taken significant steps to identify and understand the needs of their young carer population. Key achievements include the establishment of designated support personnel, the dissemination of information about young carer issues throughout the school community, and the creation of initial pathways for young carers to access necessary assistance. While this **Bronze Award** marks a strong foundation, it also serves as an encouragement to continue building upon these successes, striving towards even greater levels of support and recognition for their young carers.

We would now encourage school to dedicate a space on the school website to include information on the charity and to implement a Young Carers Policy for the 2026/27 academic year.
